

New Legislation Proposed by Ohio Stands Up!

If the science supports the narrative – pass the legislation and put the debate to rest

03/15/2021, USA – Ohio Stands Up! Is releasing new state legislation today that they are asking to be passed in every state in the union. This new transparency legislation does not block or change anything related to COVID-19 or the response – it simply seeks to end the dispute.

“If the ‘science’ supports the actions being taken and all that the public is being told then let’s pass this transparency legislation so we can put this to rest. If the other side has nothing to hide then let’s make it the law that they cannot hide it,” said attorney Thomas Renz.

Renz designed the legislation to be just over a page and very accessible to the general public. The debate on the COVID response and the safety and efficacy of the vaccine has grown substantially, and this bill would allow the public to feel comfortable that the response and vaccine are safe.

“My family has been fully vaccinated to this point and I have not historically questioned any vaccines but the misleading nature of the response to COVID has made me question the COVID vaccine. Let’s make transparency in science the law so we can all feel safe getting this vaccine if it is truly as safe as we are being told,” said Renz.

It is time to put this debate to rest and allow the American people to come together on this issue. There is never a reason to oppose transparency – unless you have something to hide.

To Whom It May Concern,

For the past year we have all found ourselves flattening a curve that was to be flattened in 14 days. Around our nation we continually heard the battle cry, “flatten the curve.” A year later we are still waiting for our rights to return to us and have become more divided than ever.

Americans are now divided on more than just policy issues – they are divided on basic facts. The first step towards ending this division is transparency. We call on the people and legislatures of all 50 states to take a stand for honesty, integrity, and transparency by passing model legislation promoting transparency in science and public health.

This bill would allow the public to access true and honest data and it would also punish those that intentionally lie. It is incomprehensible as to why ANY elected official or lobby group would oppose transparency and so we make this simple, 1 page bill, available to any state that would like to pass it.

We ask you, the public, to ask your elected officials when (not if) they will pass this. If they are unwilling, we believe you should ask why. Do we really want to allow science to be based on lies with no recourse? Remember, errors are exempt so this would not impact real science going forward – only those that seek to use it to manipulate the public and policy in general.

We do not dispute the existence of COVID-19 and find any and all loss of life tragic. We do however believe the public has a right to accurate data so they can make educated decisions about their lives. Why would anyone oppose truth?

Sincerely yours,

Thomas Renz
Attorney

The Truth in Science and Health Act

This bill is being provided to ensure the citizens of the State of _____ are given true and honest information related to science and their health. Be it enacted as follows:

- a. Any **intentional** misrepresentation or dissemination of **misleading** information related to science, public health, medicine, or medical devices, by any person, entity, or organization in or availing themselves of the privilege and opportunity of doing business in the state of _____ shall subject themselves and that entity and/or organization to civil liability. In addition, the acts described in this subsection shall also be deemed an act or acts of fraud. Information put forth without intent to mislead or in error is not subject to this liability. Further:
 - a. All data and scientific information regarding any health-related device, procedure, vaccine, medicine, or other health related product or service is subject to discovery and must be considered in any legal action related thereto in the State of _____.
 - b. There is an affirmative duty by manufacturers of medical devices, medicines, and vaccines to disclose all known and relevant information regarding any and all new information related to their products that may have any impact on the health of consumers. This affirmative duty is ongoing, with time being of the essence for disclosing such information as it becomes known to said Manufacturers.
- b. All science, data, and supporting information used to make any decisions or rules related to public health or other administrative law must be made available in full to the public at the time the rules or orders are being issued. Supporting information later becoming available must be made public immediately. All such data must be made available in an accessible format.
- c. Any non-state actors providing guidance to any public health department or administrative agency in the State of _____ must be disclosed immediately in a clear and conspicuous way.
- d. Discovery related to science or public health issues shall be a part of any civil or criminal trial taken in the State of _____ and courts shall consider the fact basis for such a suit.
- e. This law applies to any and all existing public health orders related to COVID-19 for any and all health departments and administrative agencies in the state of _____. Any orders or rules issued under emergency powers shall be given immediate priority in terms of disclosure requirements and relevant information must be made available within two weeks.
- f. There shall be no immunity from any provision of this statute.
- g. Science shall always be presented in a reasonably unbiased fashion. The use of fear and other tactics of public manipulation constitute a criminal offense (Define the Criminal

RENZ LAW, LLC.

Standard Here) and the individual(s) and/or organization using such tactics shall also be subject to civil liability.

- h. Providing an action brought under this statute is brought in good faith, claimants may recover reasonable attorney fees for such action if they are victorious in their suit.
- i. The government or non-state actor providing information or data related to this statute bears the burden of demonstrating that their actions reasonably comply with requirements of this statute.
- j. Where any other provision in the [STATE] Revised Code conflict with this Statute the language requiring the most transparency shall control.
